

# Frequently Asked Questions

## Miller County Route 52

### **1. What improvement is MoDOT making to existing Route 52 and what are the project limits?**

The improvement is to widen Route 52 from two lanes to three. This will be done by adding a 14' turn lane. The road will also have curbs and gutters and new paved approaches. The project limits are from the Route 52/Route 54 intersection south to Hays Road (approximately 1.5 miles). Temporary easements will be needed for the reconstruction of all entrances.

### **2. How much closer will the new road be to my property?**

The existing roadway consists of two 12-foot lanes. There will be a total of 10 feet added to each side of the road from the existing edge of pavement to the back of the curb. This additional 10 feet includes lane widening and the addition of new curb and gutter.

### **3. Will I still have access to Route 52 during construction?**

Yes, there will be access to Route 52 during construction. Each entrance will be reconstructed and access will remain during construction.

### **4. When will they begin construction of the new roadway and when do they plan to be done?**

Plans are due in the fall of 2002, therefore, planned construction will begin in the spring of 2003. The project should be completed in one construction season.
